Congratulations on your new Puppy!!

Brightness Beauties guarantees the puppy is healthy, free from known contagious diseases, and that your puppy has been dewormed and has received his or her age appropriate Neopar vaccination and a 5 in 1 vaccination. To be fully protected your puppy needs several more vaccinations and it is the sole responsibility of the buyer to follow through with this important protection. Do Not take the puppy to parks, common areas, stores, or visiting until he or she has received all vaccinations.

We required the puppy be taken to the buyer's veterinarian within 3 days for a check-up and to establish care.

Brightness Beauties will not be responsible or give a guarantee for disorders due to injury, contagious or infectious diseases or viruses the puppy contracts after leaving our property. We are not responsible for neglect, poor diet, or preventable conditions. Buyer must maintain the puppy's health with proper veterinary care, proper diet & nutrition, proper care, and have all current vaccinations.

We include the Health Guarantee, a sample of the puppy's food, health record, and a blanket that smells of littermates and mom. If your puppy is microchipped you will receive the information in your go home folder and Brightness Beauties remains as a permanent secondary contact. We try and microchip every litter but we cannot always manage it.

Brightness Beauties Puppy Health Guarantee

Brightness Beauties warrants that every precaution has been taken to insure the physical soundness and mental stability of your puppy. He or she is active, eating well, and socialized. Buyer has one year from the date of the puppy's birth to have your puppy checked out by your veterinarian for genetic disorders. If your veterinarian finds the puppy to be unhealthy as a result of abnormalities, genetic disorders or defects from birth that will be life threatening we will require a second opinion and written verification from the 2 different veterinarians, on their letterhead with a phone number and address. This is at buyer's expense and Brightness Beauties will not reimburse any costs. Brightness Beauties must be notified within 5 days of diagnosis. Once the condition is verified by us you can surrender the puppy back to the seller and receive a new puppy of like breed. If you decide to keep your puppy, you assume all responsibility for their care, including, but not limited to, veterinarian bill, medicines, and any other bills incurred. Brightness Beauties will not be responsible or give a guarantee for disorders due to injury, contagious or infectious diseases or viruses the puppy contracts after leaving our property. We are not responsible for neglect, poor diet, or preventable conditions. Buyer must maintain the puppy's health, with proper veterinary care, proper diet & nutrition, proper care, and have all current vaccinations.

If at any time buyer finds that he or she is unable to properly care for the new puppy, the puppy/dog can be surrendered back to Brightness Beauties, regardless of age, with no money refunded.

Important Information about Vaccinations

Your puppy has received a Neopar (Parvo only) vaccination at 5 weeks and a Solo-Jec 5 (Distemper, Adenovirus Type 2, parainfluenza, and parvovirus) at 7 weeks. Your puppy will need 3 more 5 in 1 vaccinations at 9 weeks, 12 weeks, and 15-16 weeks. The Rabies vaccination is due between 4 and 6 months and should be the only vaccination given at that time.

We administer the first two vaccinations here at Brightness Beauties, we have ample experience in this area. We order the vaccinations from Revival Animal Health and they are shipped overnight in ice packs to keep them cool and the unused vaccinations are kept in our refrigerator. The stickers from the vaccinations are put on the health record and show what was given and the expiration date of the products, as well as the date they were administered.

Some veterinarians are suggesting that the vaccinations that we have given the puppy do not count. Over vaccinating a puppy/dog can result in autoimmune disorders, severe allergies, and sometimes much worse and we want our new puppy parents to be informed. There is a titer test that can be given that will determine if a puppy/dog has the antibodies from the first vaccinations given and should be requested if your veterinarian suggests the vaccinations be started over.

If you choose to start the puppy vaccinations over without a titer test showing the puppy does not carry the antibodies needed the Brightness Beauties Puppy Health Guarantee will be Null and Void.
